

OPALQM: AN INTEGRATED SOLUTION

Most medical schools today are forced to implement a patchwork of systems in an attempt to meet their curriculum management needs. This means students and faculty must face multiple websites, different login credentials, and awkward workflows. Administrators and Deans must handle multiple data sources with no way to get an integrated view of outcomes, the curriculum, and the school.

With OpalQM, you get an integrated solution that provides students and faculty with streamlined workflows, and provides administrators and Deans with integrated reports.

In a recent survey, 93% of students using OpalQM felt it would enhance their education.

Only OpalQM takes all the tools you need and integrates them into a single, streamlined user experience. OpalQM combines:

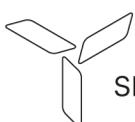

- **Individualized Calendars:** Students and faculty see their own unique calendar. If an event changes, the user's calendar updates immediately.
- **Curriculum Explorer:** Users can search or browse the curriculum in an easy, intuitive interface, allowing them to review what's been taught and where.
- **Learning Materials:** Learning materials are linked to the curriculum, but they can also be browsed or searched independently, providing easy access to their knowledge base.
- **Reporting & Analytics:** OpalQM's unique reporting and analytics modules provide the most advanced, integrated, and flexible access to your school's data.
- **Clinical Evaluations & Logbooks:** OpalQM's clinical tools are an integral part of the OpalQM workflow, allowing users to seamlessly move between their calendars and their tasks.
- **Questionmark Perception Integration:** OpalQM is tightly integrated with Perception to allow exams and quizzes to be directly associated with individuals, events, and objectives.
- **Custom In-House Integration:** Only OpalQM's "Custom Off-the-Shelf" model allows tight integration with your unique, in-house systems and tools.
