

OPALQM MOBILE: THE INFORMATION YOU NEED, WHEN YOU NEED IT

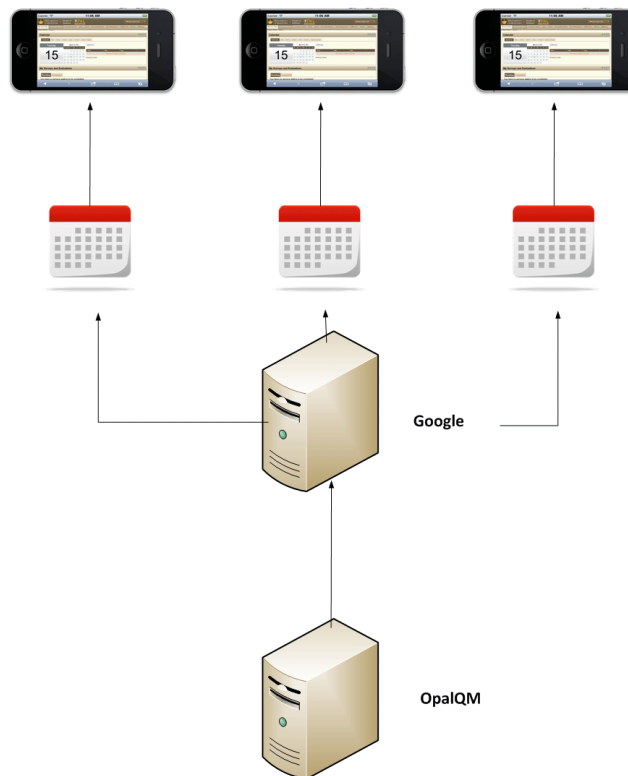

Smartphones and tablets are now commonplace across medical schools. The convenience and intuitiveness of instant access to information has changed the way students and faculty interact with the curriculum. OpalQM's **mobile access** and **automatic calendar synchronization** bring this accessibility to the next level.

Automatic Calendar Synchronization

When schedules change, students and faculty need to know immediately. OpalQM's auto calendar synchronization gives you up-to-date access to all your specific sessions and events, without requiring a separate calendar application. OpalQM supports all major mobile platforms, including BlackBerry, iPhone, Android, Windows Mobile, and Nokia, as well as other devices which support the SyncML standard. Using Google Calendar, you simply add a calendar to your mobile device, and any schedule changes that affect you are **pushed directly to your smartphone**.

Mobile Access

Students need access to their clinical logbooks in real time. As a web application, OpalQM's logbooks are immediately available on your smartphone. Not only that, but most of the OpalQM application is **easily accessible on your mobile device**, whether you're filling in a rotation evaluation or downloading your course notes.

"OpalQM is a simple solution to a complex problem."

- James Bras, Student
